Pure New Wool

We love working with natural fibres - pure new wool is a 100% natural fibre and provides a huge amount of warmth because it's a natural insulator. It's also completely renewable, so as long as there is grass to graze on, every year sheep will produce new fleece.

Drapers Collection

The Drapers Collection is designed to champion up-and-coming designers. Each year sees a fresh cast of talented individuals compete to create designs that will become part of the Tweedmill collection.

These new designers operate with creative freedom and bring a new vision to throw designs. For the winner, it's a unique opportunity to design and create a product range that is sold all over the world.

The Drapers Memorial Textile Prize was created alongside the Shrewsbury Drapers in 2016, in memory of Jackie Ryan who held the reins at Tweedmill for more than 25 years.

Our 2023 winner was Rose Hutton, who designed the beautifully intricate 'Hutton Check'. Previously to this was Isobel Onions who designed the 'Isobel Crescent' - a detailed weave available in three soft colour tones.

Quality is woven into us

The craftsmanship involved in weaving a wool blanket is a blend of traditional expertise and meticulous attention to detail. Each process begins with the raw wool, cleaning and carding it to create soft, fluffy fibres that are ready for blending and dyeing to achieve the perfect colour shade.

Once the dyed yarn is spun, our skilled team warp the yarn on to beams ready to start weaving.

Master weavers develop an intuitive feel for the loom, weaving intricate patterns and designs into beautiful fabrics. Once woven, pieces of fabric are sent to finishing which involves fringing, scouring and tenting before the final process of raising takes place, enhancing the fabric's softness and warmth.

Finally, fabrics and blankets are cut into finished products such as picnic rugs, homeware and accessories. Details such as labels and blanket stitch edging are added by hand and then our production team quality check, fold and pack every product before they make their journey to your store.

Let's talk all things wool

We've always championed working with wool, and for good reason. There are so many benefits to this natural material. One of which is that it is a circular fibre - as long as there is grass to graze on, sheep will continue to grow their fleece, making it completely renewable. It's also extremely breathable as the fibres in the wool form tiny pockets of air, allowing the material to absorb moisture.

Pure New Wool

Pure new wool refers to wool that has not been previously processed or used in any form. It is also known as virgin wool. Pure new wool is valued for its purity, strength, and high quality. It retains the natural crimp and resilience of the fibres, providing excellent insulation and durability. Products made from pure new wool are often of superior quality, offering enhanced comfort and longevity.

Lambswool

Lambswool is wool taken from the first shearing of a young sheep, usually around 7-8 months old. This wool is extremely soft, smooth, and fine because it comes from the sheep's first coat. Its delicate texture and superior softness make it a luxurious material often used in high-quality woollen products.

Merino

The Merino breed is prized for producing some of the finest and softest wool in the world, originally from Spain but now also bred in Australia and New Zealand, among other places. This type of wool is renowned for its exceptional softness, fine texture, and breathability. The fibres of Merino wool are significantly finer than those of traditional wool, often measuring less than 18.5 microns in diameter.

Merino Wool - 75 x 100cm - Beautifully finished with a luxury ribbon & sheep shaped gift tag

Recycled

What's even better than wool? Recycled Wool!

This collection uses wool that was once destined for landfill to give it a new lease of life as a blanket. As the wool we use is rescued we never know what colours we might get - therefore the collection is available in random assorted colours, so you get the magic of a surprise each time new stock arrives.

Recycled Wool Throws

Recycled yarn is put together on creels for warping

Warp beams are put into the loom for expert weavers to weave

Pieces are then sent to be finished, cleaned and raised

Each blanket is then carefully cut by hand, a label is sewn on and it's folded.
